Solutions for
high quality
machining

BAR CODE READER (OPT)

- No errors with automatic program recall

TECHNOLOGY FOR OPTIMUM EDGE BANDING

ORION 110 CONTROL SYSTEM

(supplied as a standard feature on the entire range)

- Basic and intuitive for error-free machining
- Memory capacity with up to 60 working programs
- Large characters for easy reading

STARTOUCH CONTROL SYSTEM (OPT)

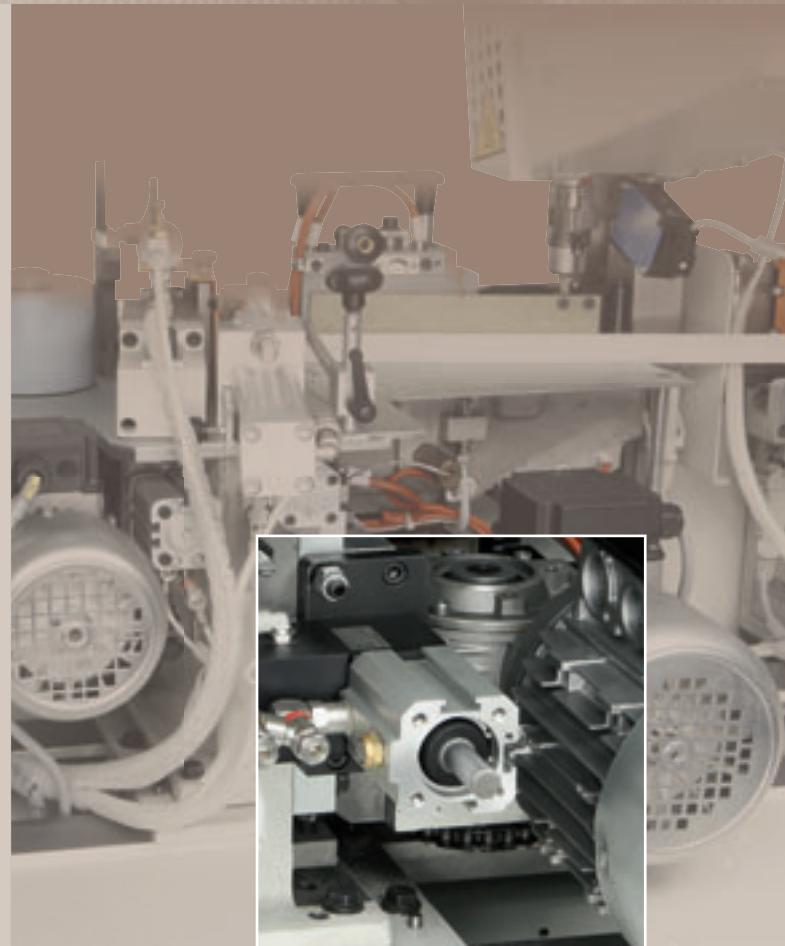

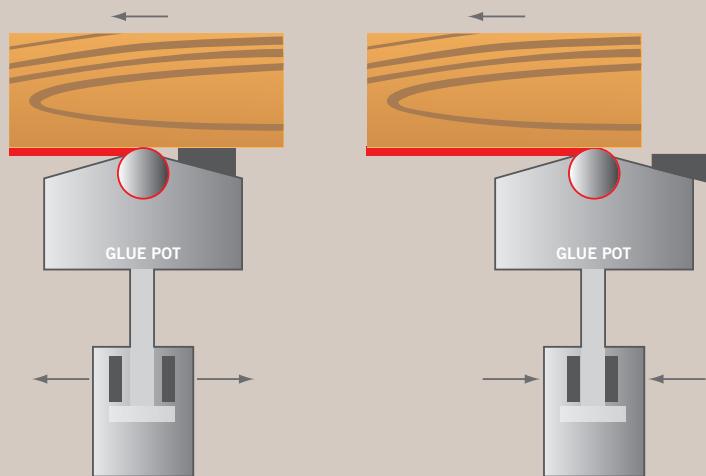

- Intuitive and easy to use thanks to its customised graphics and one touch mode
- Large dimensioned display (12")
- Simple when choosing the machining required
- "TELESOLVE"(opt) for diagnostic and on-line service

"iGLUE" KIT (OPT)

► Optimum finishing including delicate panels.

The locking of the glue pot copying operation in the last panel section avoids contact of the roller with the panel

► Automatic exclusion of the glue pot in the case of non-use of the group or stopping of the feed track

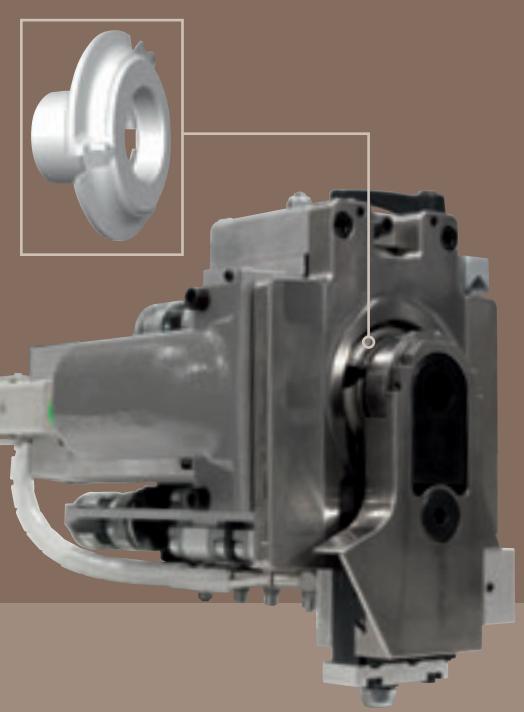

● "ED SYSTEM" EXHAUST SYSTEM

- Increased cleaning of panels thanks to optimum chips suction with the "ED-SYSTEM" function which couples the encircling exhaust hood to the suitable container with a filter for long chips

● GLUE POT SUBSTITUTION

- Rapid changeover of the glue colour/type of glue to be applied.
- The "Fastlock" rapid unlocking system allows for fast glue pot substitution, while the "double thermoregulation system" manages two working temperatures in order to apply both EVA and Polyurethane thermosetting adhesives (opt)

**Reliable
for high
productivity**

**ALL WHAT YOU EXPECT FROM
AN EDGE BANDER... AND MORE**

PANEL SPACER (OPT)

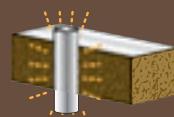

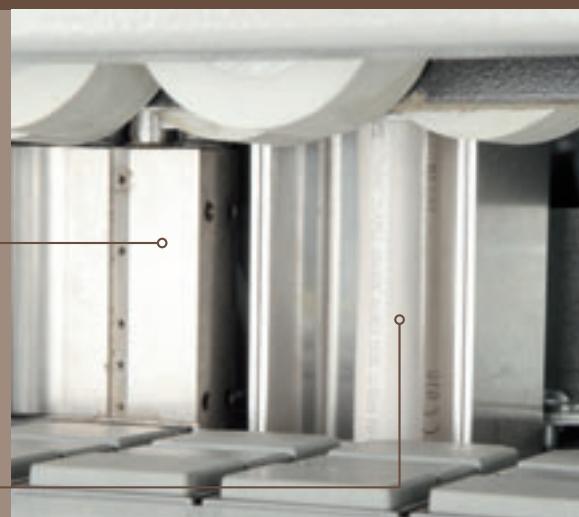

- Panel introduction into the machine with the correct space between panels
- The distance between the panels is automatically optimised according to the selected operating groups

► BLOWER FOR PANEL CLEANING

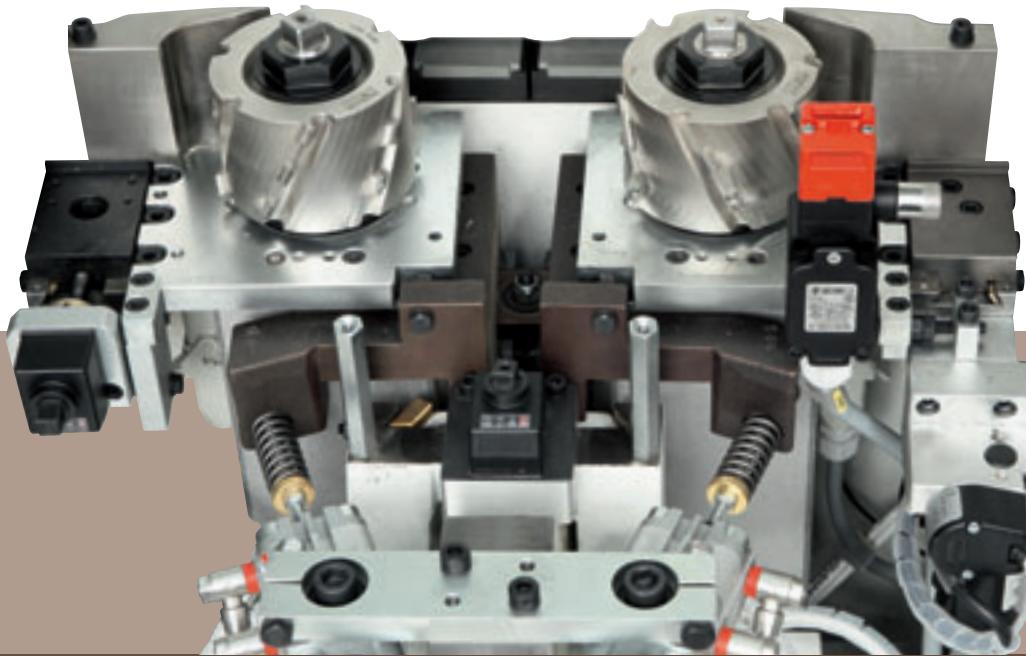

- Optimum glue adhesion with the cleaning of the machined surface

► INFRARED CERAMIC LAMP (OPT)

- Improved glue adhesion due to heating of the surface to be glued

Infrared
ceramic lamp

RT-E panel edge trimming group

▲ **RT-E PANEL EDGE TRIMMING GROUP**

- ▶ Provides a perfect surface for gluing the edge
- ▶ ED SYSTEM high efficiency exhaust outlets
- ▶ Constant removal on the entire panel length with the copying devices kit (opt)

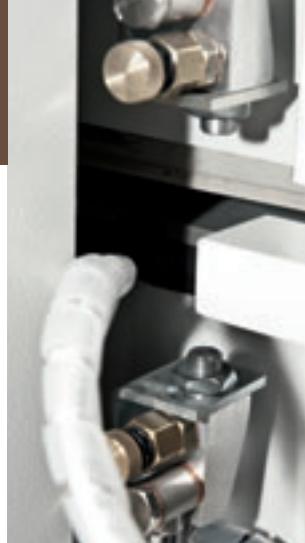

► **AAR ANTI-ADHESIVE GROUP (OPT)**

- ▶ It ensures the highest finishing quality by preventing the glue sticking to the upper and lower panel surfaces

▲ **"EASY SIZE PLUS" DEVICE (OPT)**

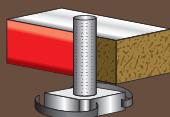

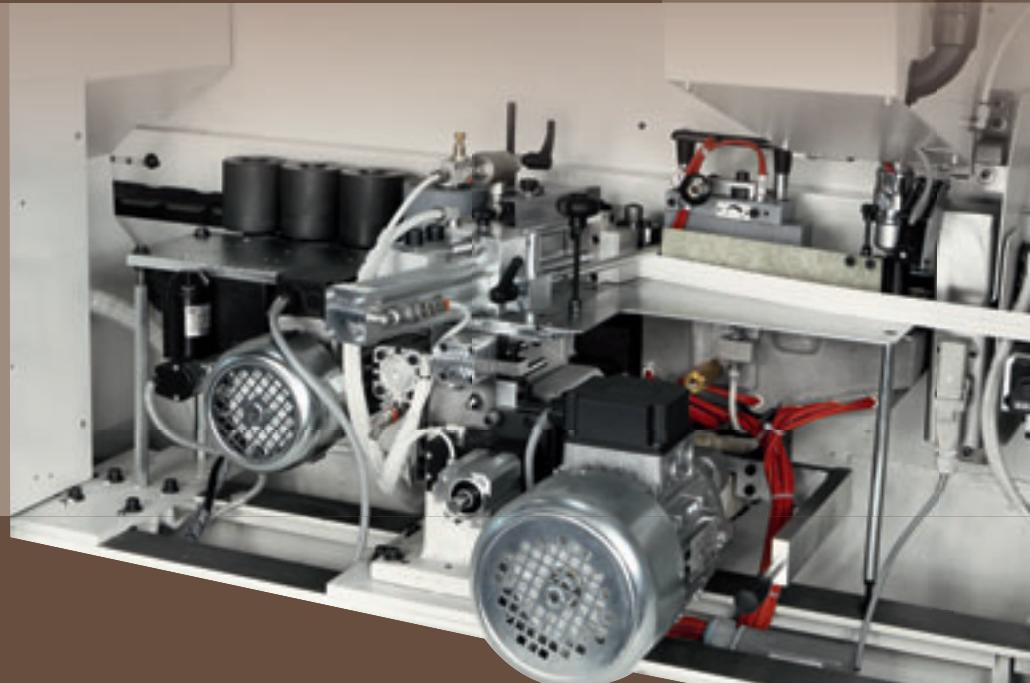

- ▶ Allows the adjustment of the material removal of the panel edge trimming group in a few seconds due to the powered axes positioned on the infeed fence and copying device of the group

AAR anti-adhesive group

► **VC 800 GLUING GROUP**

- ▶ **It is possible to edge material strips up to 12 mm thickness and coiled edges up to 3 mm**
- ▶ Pre-melting device for the automatic feed of glue to the glue pot (opt), it is advisable for panels which require a high consumption of glue
- ▶ Optimum gluing of solid wood edges with VC 1000 glue pot that allows the reverse rotation of the glue roller (kit 12 mm opt)

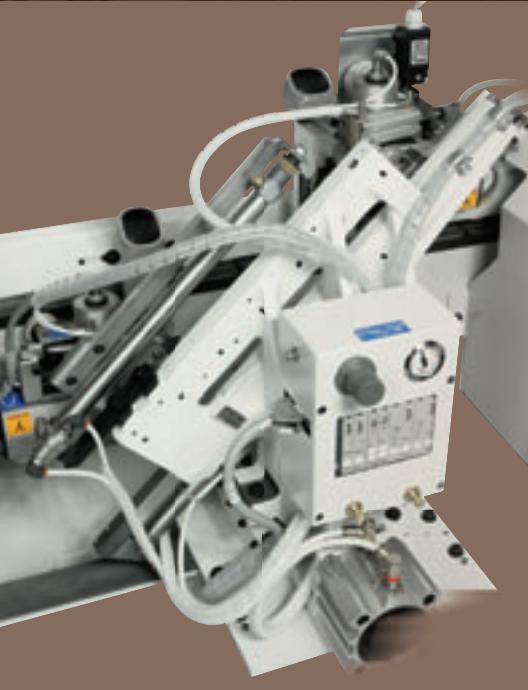

VC 800 gluing group

**Reliable
for high
productivity**

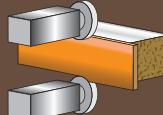

ALL WHAT YOU EXPECT FROM AN EDGE BANDER... AND MORE

K/SEL
end cutting group

- **K/SEL END CUTTING GROUP**
 - The best finishing quality thanks to the motors sliding on two independent guides
 - Rapid set-up between straight and angled cutting with the automatic independent tilting of the motors (opt)
 - Horizontal movement of the group in order to leave an exceeding edge that ensures an optimum finish of the Round group (opt)

- **RS/K IN-LINE TRIMMING GROUP**
 - For the trimming of a solid wood edging or the removal of the exceeding edge thus providing the following chamfering operation
 - ED SYSTEM high efficiency exhaust outlets

RS/K
trimming group

NESTING COPYING DEVICES (OPT)

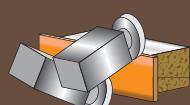

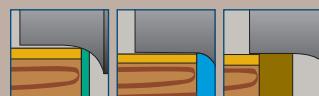

- No difficulty when finishing panels already processed with the "nesting" working cycle, through the suitable copying devices to be mounted on the upper part of the trimming and edge scraping groups

- **RI/800 TRIMMING GROUP**
 - The very best finishing quality with the rotating front and vertical copying discs
 - Rapid machine changeover between thin, radius and solid wood edges with the 2 and 3 pneumatic positions kit (opt)
 - Solid wood changeover without any operator intervention, thanks to the powered axes installed on the front copying devices (opt)
 - ED-SYSTEM high efficiency exhaust hoods

2 POSITIONS KIT

3 POSITIONS KIT

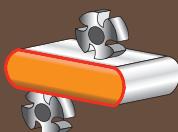

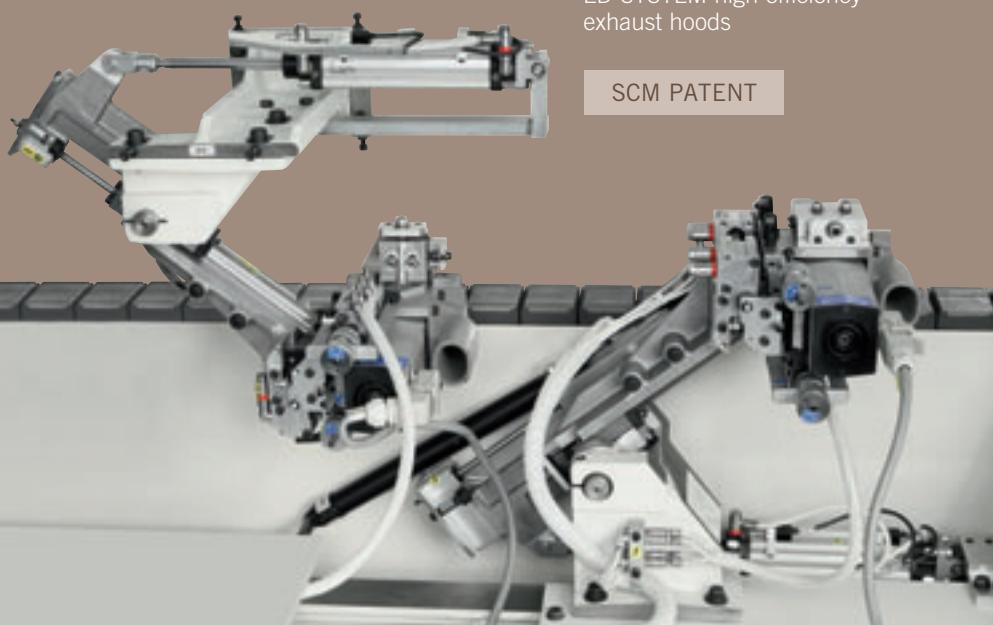

RI/800
trimming group

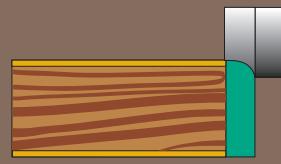

2 MOTORS ROUND GROUP

- Perfect rounding and trimming of straight, chamfered and post formed panels
- **Rounding angles with 16 m/min track speed**
- ED-SYSTEM high efficiency exhaust hoods

SCM PATENT

2 motors round group

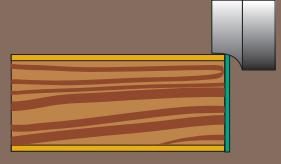

3 mm

0,8 mm

0,6 mm

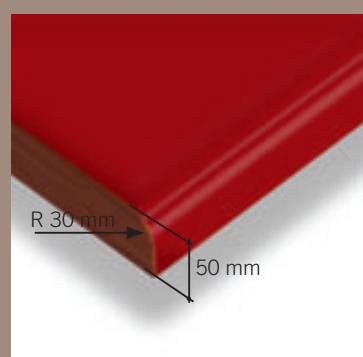

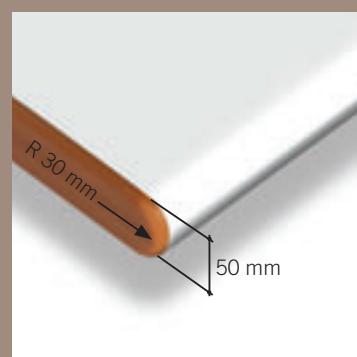

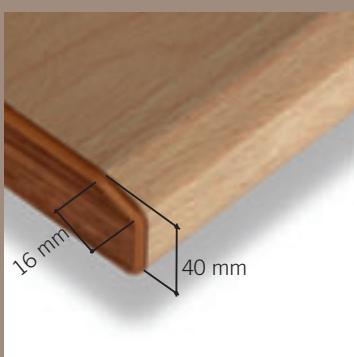

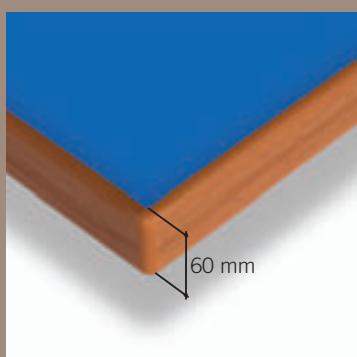

0,4 mm

"4 EDGE" KIT (OPT)

- Automatic positioning of the group for the machining of 3 thin edges and 1 radius edge

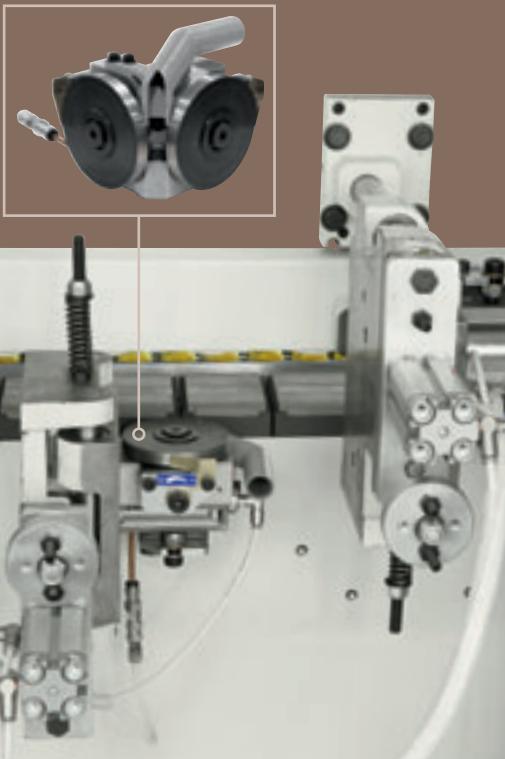

MACHINING EXAMPLES WITH THE 2 MOTORS ROUND GROUP

**Reliable
for high
productivity**

ALL WHAT YOU EXPECT FROM AN EDGE BANDER... AND MORE

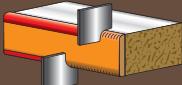

► RAS/1000 EDGE SCRAPING GROUP (OPT)

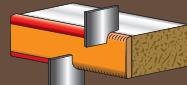

- ▶ **Rapid and easy work changeover of the radius edge thanks to the substitution of the cutter-head, complete with rotating copying discs**
- ▶ For the finishing of the PVC/ABS radius edge
- ▶ The group is complete with extraction hood with suitable container with filter for long chips

► RAS/S 2P EDGE SCRAPING GROUP (OPT)

- ▶ **Automatic work changeover of the radius edge through the two tool pneumatic positions**
- ▶ For the finishing of the PVC/ABS radius edge
- ▶ The group is complete with large dimensioned extraction hood with suitable container with filter for long chips

**RAS/1000
edge scraping group**

**RAS/S 2P
edge scraping group**

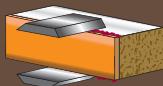

► RCL GLUE SCRAPING GROUP (OPT)

- ▶ Eliminates any excess glue on the panel surface
- ▶ Optimum use with soft/ post formed panels thanks to the independent intervention of the two tools

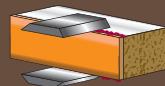

► RCA/2C GLUE SCRAPING GROUP (OPT)

- ▶ Eliminates any excess glue on the panel surface
- ▶ Best finishing quality even on the panel edges due to the two rotating copying discs

**RCL glue
scraping group**

**RCA/2C glue
scraping group**

● K-100 SPINDLE MOULDER GROUP

- ▶ It carries out through grooves or timed grooving on the front or lower panel sides
- ▶ The group is complete with front copying devices and exhaust hood

● PANEL MOVEMENT SYSTEM

- ▶ Perfect straight movement of the chain and panel holding due to the large dimensioned chain (1-1/4")
- ▶ Automatic lubrication of the blocks

● SPN BRUSHING GROUP (OPT)

- ▶ Allows panel cleaning and polishing
- ▶ Easy adjustment with the hand wheel supplied with the group

SPRAY-MIST DEVICE FOR EDGE FINISHING (OPT)

- ▶ It improves the panel cleaning and the polishing of the PVC/ABS edge

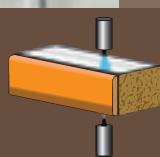

● HOT AIR BLOWER FOR PVC/ABS EDGES (OPT)

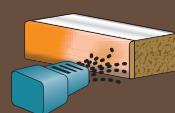

- ▶ It reactivates the colour of the PVC/ABS edges

SPN
brushing group

Spray-mist
device

Hot air
blower

Edge thickness	mm	0,4 - 8 (12 opt)
Min. panels length	mm	140
Feed speed	m/min	12 - 18

K 800 NOISE LEVEL

Operating conditions: PANEL EDGE BANDING (reference standard EN 1218-4:2004+A2:2009)*

		Reference standard	Uncertainty factor K (prob. 68.27%)	EDGE BANDING	
Lop: noise level at operator position - dB (A) and peak level - [dB (C)]	Operator position			VSA	LAV
	Input	UNI EN ISO 11202-97	≤ 4 [dB (A)]	75.3	77.5 [102.0]
	Output			76.5	78.5 [100.8]
Lw: emitted noise level - dB (A) _{re 1pW} - [mW (A)]		ISO 3746-95	≤ 4 [dB (A)]	91.9 [1.5]	93.6 [2.3]

The maximum instantaneous noise level pressure C, is under 130 dB (C)

VSA: no machining without dust extractor equipment LAV: machining

* Refer to R.d.P. 2011007r for test conditions different to the mentioned standards
